

How to download the Parent Portal App for your Phone

You can search for the App '*Insight from Tasc Software*' and download onto your phone:

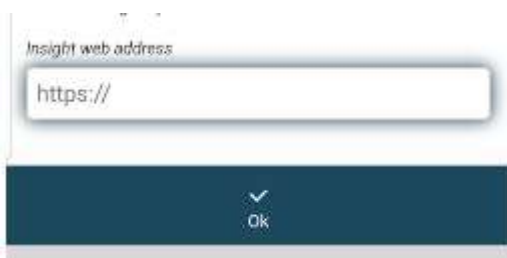

- For Apple devices please use the Apple Store
- For Android devices please use the Android Play Store.

Once you have successfully downloaded it onto your phone you should be able to see the Insight application icon on your phone.

The first time you run the app it will prompt you with instructions on what you need to do. If you don't have another device to hand, then simply enter the school Parent Portal web address <https://parentportal.bishopramseyschool.org> in the field provided and then hit the ok button.

You will then be prompted for your username and password to complete the installation and the app will now be ready for you to use, unlike the full web version it will **not** ask you for a PIN.
